

STARBURST
LAUNCHING 2026

SUPERNOVA
LAUNCHING 2027

Portal Space Systems is developing the next generation of satellites where maneuverability is the baseline, enabling resilient commercial, national security, and civil space missions from Earth to the Moon.

Portal Space Systems

8,000ft

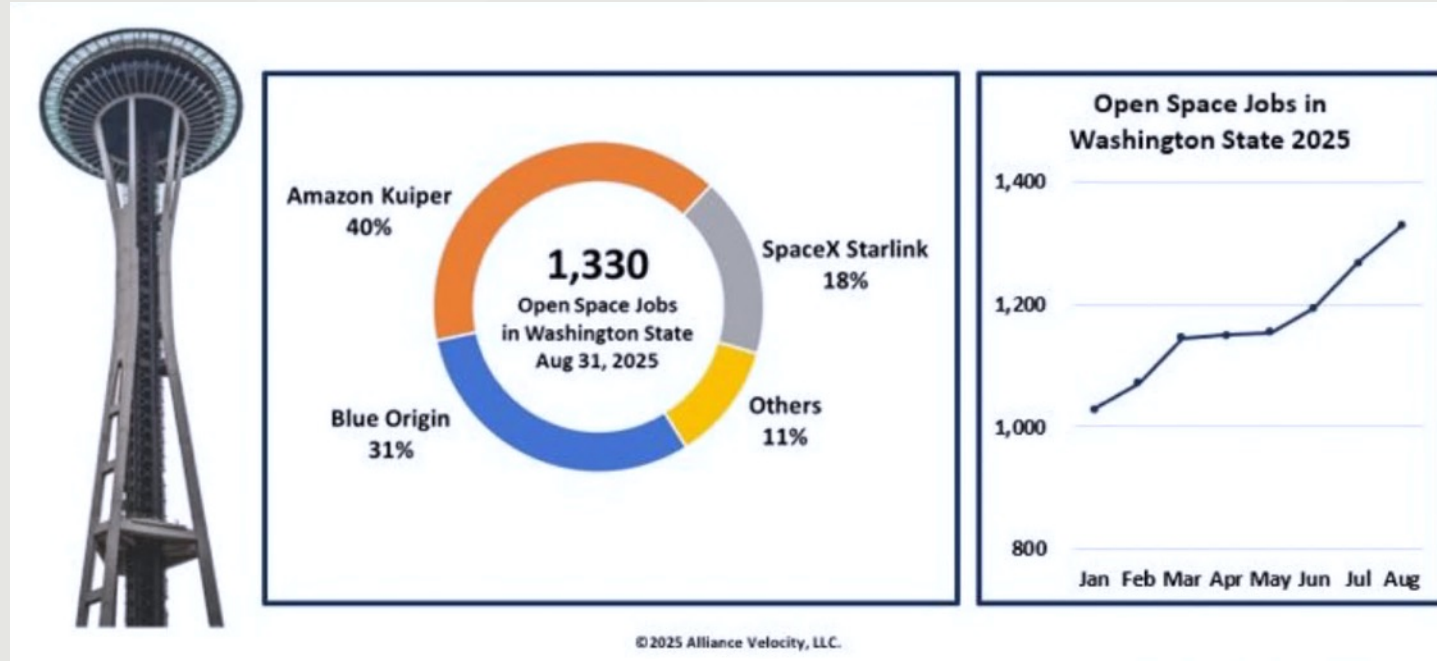

50,000ft

- Since our founding in 2021, Portal has been in an active development phase - working closely with customers to refine requirements and validate our technology.
- We are now transitioning from early development and testing to manufacturing spacecraft for customer missions.

- Scalable manufacturing capacity
- Open, high-bay integration space
- Customizable infrastructure
- Long-term regional alignment

Why Seattle?

- **60+** space companies employing **12,000+** people
- Roughly **\$5B** annual economic impact to the state
- **\$15B+** invested by Blue Origin, SpaceX & Amazon
- **40** space companies founded since 2015, raising **\$2.6B+** in capital
- **\$4.8B+** in DoD & NASA contracts from FY 2020-2024
- **65%+** of all operational satellites manufactured in Washington
- **1,330** open space jobs as of August 2025

Why Snohomish County?

- ✓ Proven Aerospace Leadership
- ✓ Complete Space Ecosystem
- ✓ Concentrated Technical Talent
- ✓ Scalable Manufacturing Environment
- ✓ Committed Public & Private Partners
- ✓ Community + Quality of Life

A satellite in Earth orbit with two large parachutes deployed, surrounded by other satellites in space.

PORTAL

Portal's long-term vision is to strengthen America's ability to operate, build, and secure a thriving space economy - from Earth orbit to the Moon.

Behind the Scenes

Before the Announcement

- *Permitting and utility pathways defined*
- *Early partner alignment*
- *Incentives in place*

After the Announcement

- *Ongoing coordination and communication*
- *Workforce partnership and support*
- *Positioned for future growth*

Execution continues long after the headlines.

Opportunity lives here.

The Broader Impact

The Impact

100 jobs in 2 years | 700 jobs in 5 years
\$160M capital investment
\$175k average wages

What This Means

- Expands Washington's leadership in space and advanced manufacturing*
- Strengthens the aerospace supply chain*
- Signals to future innovators that this region delivers*

Wins like this compound.

Opportunity lives here.

What We Do Matters

Great companies will grow.

Where they grow is influenced by preparation.

What we provide:

- *Alignment across partners*
- *Clarity through complex processes*
- *Responsiveness during fast decisions*
- *Aftercare long after the headlines*

We don't create companies.

We create the conditions that make growth possible.

Opportunity lives here.
